Product Manager

U.S. Elections Service

Led the design and execution of the technology platform that broke the AP's monopoly on live US election results. Data was collected via mobile app from jurisdictions nationwide, published via API. Scrum Product Owner who specified the requirements, set the priorities, and achieved consensus. Defined the API, designed the data analysis applications, managed the technology vendors, guided the integrations.

Reuters White Label Web Publishing Platform

Scrum Product Owner who led the design and development of Reuters' modular and highly customizable SaaS platform for publishing automated web and mobile sites. Specified the requirements, designed the product administration user experience, set the priorities, achieved consensus. Over \$700,000 in first year sales.

World Cup White Label Hosted Solution, Data Modules, and API

Scrum Product Owner who led the development of the Reuters Web Publishing System into a complete white label solution for World Cup news and results: a customizable hosted web platform, a suite of live results modules, a data API, an administration console to manage it all. Served 29 customers in 11 languages. Over \$500,000 in sales.

Winter Olympics White Label Hosted Solution, Data Modules, and API

Scrum Product Owner who led the development of the Reuters Web Publishing System into a complete white label solution for Winter Olympics news and results: a customizable hosted web platform, a suite of live results modules, a data API, an administration console to manage it all. Served 12 customers in 5 languages. Over \$200,000 in sales.

Reuters Connect API

Set the direction, managed the development, and advised customers how to integrate the API solution for searching and ingesting Reuters text, online reports, video, and graphics. Powered over 100 customers and internal systems.

Reuters Pictures API

Led the development and execution of the API solution for searching and ingesting Reuters photography.
